

GILBERT B. MANGLAY

COMPUTER ENGINEER

+63 963 8964 247 | manglaygilbert18@gmail.com | Visit My Portfolio | LinkedIn

OBJECTIVES

Detail-oriented and passionate Computer Engineering graduate (cum laude) with a strong background in IT Support and hands-on experience building full-stack applications, object-oriented programming, and data structures through intensive coursework and personal projects. Skilled in Python, React, C++, Java, SQL, NoSQL, and Django web frameworks with a strong drive to apply analytical skills and a fresh perspective as a Software Developer.

TECHNICAL SKILLS

Programming Languages - C++, Java, HTML, CSS, JavaScript, React, Python
Web Frameworks - Django
Databases - MySQL, MongoDB, PostgreSQL(AWS), SQLite
Version Control - Git, GitHub, GitHub Desktop
Tools - Vs Studio Code, PyCharm
IT & Tech Support - OS Installation & Maintenance, Hardware/Software Troubleshooting, Peripherals
Networking & Admin - IP Addressing, DNS, VPN, Wi-Fi Setup, Tech Support, Remote Tools
Productivity - MS Office, Google Workspace, Canva

EDUCATION

Rizal Technological University, 4th Year College - Mandaluyong City Year 2022 - 2026

- **Bachelor of Science in Computer Engineering (BSCpE)**
- **Cum Laude - GWA: 1.62**
- **Relevant Coursework:**
  - Programming Logic and Design
  - Object Oriented Programming
  - Advanced Programming
  - Numerical Methods
  - Software Design
  - Assembly Language Programming
  - Digital Logic Design
  - Data Structures and Algorithms

EXPERIENCE

IT Support Intern
Rentokil Initial Philippines
(**Internship | Febuary 02, 2026 – March 27, 2026**)

- Delivered technical support to end-users, troubleshooting hardware, software, and network-related issues both locally and remotely.
- Installed, configured, and maintained workstations, printers, and peripheral equipment to ensure optimal daily operations.
- Managed basic network connectivity, including Wi-Fi, LAN, and IP configurations, while ensuring systems remained updated with security patches and antivirus software.
- Documented technical issues and resolutions to improve internal knowledge sharing and future reporting.

ACADEMIC PROJECTS

ROBOT ARM: CONTROLLABLE USING BUTTONS WITH BUZZER

Develop a robot arm that can be manually controlled using push buttons. Implement basic servo motor control using an ESP32 microcontroller. Apply simple digital input logic for directional and gripping movements and include a buzzer as an audible indicator when the robot arm performs an action.

IoT-Based Weather Station for Real-Time Environmental Monitoring and Web-Based Data Visualization

Develop an IoT-based weather station using microcontroller and environmental sensors. Enabled real-time data transmission and web-based visualization. Implemented data logging and basic analytics for environmental monitoring.
